

## *Dwarf Korean Lilac (Standard)*

*(Syringa meyeri 'Palibin')*

Mature Height: 6'-8'

Mature Spread: 4'-6'

Growth Rate: Slow

Flower: purple

Fall color: Yellow

USDA Hardiness zone: 3-7

Dwarf Korean lilac is grown as both a shrub and as a top-graft "tree form". It is an elegant dwarf tree that produces an abundance of purple, fragrant blooms in the spring and early summer. The foliage is a dark green, turning to yellow in the fall. Its small size and formal shape, make it an excellent choice for small landscape beds and close to buildings. The fragrant flowers are a draw to butterflies in the spring. It performs best in a well-drained location in full sunlight.
