

## *Emerald Feather Juniper*

*(Juniperus virginiana 'J.N. Select green')*

Mature Height: 10'-15'

Mature Spread: 3'-5'

Growth Rate: Fast

USDA Hardiness zone: 3-8

Emerald Feather juniper is a dwarf variety of eastern red cedar that is tightly columnar. Its bright green foliage takes on a reddish cast in the winter. It is tolerant of a wide variety of soil conditions and can tolerate extended periods of drought once established in the landscape. Its shorter height make it an excellent choice where Taylor juniper are too tall.

Its narrow growth habit makes it an excellent choice for small spaces or close to buildings. The silver-blue berries offer a contrast to the green foliage and provide food for many kinds of wildlife.
