

Flame Amur Maple

(Acer ginnala 'Flame')

Mature Height: 15'-20'

Mature Spread: 15'-25'

Growth Rate: Moderate

Fall Color: Orange/Yellow

Amur Maple is a small, multi-stemmed tree that is excellent for ornamental plantings or as a deciduous windbreak. It is native to northeastern Asia and tolerates severe winter conditions well. It does not tolerate heavy or alkaline soils, but is fairly drought tolerant. It makes a great accent tree for landscape design, and also works well

in small yards. It makes an excellent windbreak plant and can also be trimmed into a hedge shape. It can be used as either a small ornamental tree or as a large shrub. It will also tolerate a wide variety of hardiness zones from 2-8.
