

Ivory Silk Lilac

(Syringa reticulata 'Ivory Silk')

Mature Height: 20'-25'

Mature Spread: 15'-20'

Growth Rate: Medium

Fall Color: Yellow/brown

Flower: White

Blooming later than most tree lilacs, Ivory Silk is a hardy, medium sized ornamental tree that is grown as single and multi-stemmed plants. It prefers full sun and acidic soils, but will tolerate partial shade. The creamy white flowers are very fragrant, and are a favorite of butterflies and hummingbirds. It

makes an excellent specimen tree in the landscape, but will also make a beautiful privacy screen. Due to its larger size, it can also be used as a shade tree in smaller yards.
