

## *Moraine Sweet Gum*

*(Liquidamber styraciflua  
'Moraine')*

Mature Height: 60'-75'

Mature Spread: 40'-75'

Growth Rate: Moderate

Fall Color: Red, Purple, Yellow,  
and Orange

The star-shaped leaves of the sweetgum are interesting in any color. They are a glossy, dark green in the summer and turn brilliant shades of red, purple, yellow and orange in the fall. Moraine is the most cold-hardy of all of the species, and will tolerate periods of standing water for much longer than many tree species. It requires little maintenance to maintain its symmetrical, pyramidal shape. It will become quite large at maturity and is an excellent shade tree for large yards, acreages and city parks.
