Potted trees must be ordered with minimum quantity of 25. You can mix and match between species and sizes to meet this minimum order. Additional discounts can be applied to orders over 250 trees. Please call for custom quote for larger orders. Some trees are being grown in plastic containers and some are in Root Pouch bags. RP indicates those grown in Root Pouch bags. As crops are planted or are ready, availability will be updated.

6s seedling Norway Spruce and White Spruce are park grade trees. They are tall, with less side branching. These are designed for reforestation or windbreak applications primarily.
