

## *Prairie Dream Paper Birch*

*(Betula papyrifera 'Varen')*

Mature Height: 40'-50'

Mature Spread: 30'-40'

Growth Rate: Fast

Fall Color: Yellow

The peeling white bark and bright yellow fall color make this a beautiful specimen tree. It is tolerant of a wide variety of soils and temperature variations.

Discovered and developed in North Dakota, it is hardier and more resistant to bronze birch borer than the species. The peeling bark is bright white, and the dark

green leaves are a perfect contrast. The fall color is a brilliant yellow that stands out in the landscape. It is frequently grown as a multi-stemmed tree, but can also be grown as a single trunk that makes either a great shade tree or focal point of the landscape.
