

# *Triumph Elm*

*(Ulmus 'Morton Glossy')*

Mature Height: 50'-60'

Mature Spread: 30'-40'

Growth Rate: Fast

Fall Color: Yellow

Triumph is one of the newer cultivars of American elm developed in the elm improvement program at the Morton Arboretum. Its shape is an improvement over most of the elm varieties and is easily trained to have a central leader as a young tree. It has strong resistance

to Dutch Elm disease and quickly grows into a large, graceful shade tree. It transplants very easily and tolerates a wide variety of soil conditions. An excellent choice for private and commercial plantings.
