

Tulip Poplar

(Liriodendron tulipifera)

Mature Height: 50'-70'

Mature Spread: 30'-50'

Growth Rate: Fast

Flower: Yellow, tulip-shaped

Fall color: yellow to orange

The Tulip Poplar is a large, fast-growing shade tree that has a bright yellow flower in spring. It grows best in moist, well-drained soils. It grows well in full sunlight, but can tolerate partial shade as well. It is not very drought tolerant and will need extra watering in dry summers. Young trees need to have trunks protected as the bark is a favorite of rabbits.
