

# *Autumn Blaze Maple*

*(Acer freemanii 'Jeffersred')*

Mature Height: 40'-50'

Mature Spread: 30'-40'

Growth Rate: Fast

Fall color: Red

Autumn Blaze is one of the first freemanii varieties to be commercially available. It was first discovered in the 1960's and has been improved over the years. The fall color is a reliable, vibrant red, and like other hybrids, it is seedless. It is a hardy tree that will perform well in a wide variety of soils. It tolerates wet soils better than true red maples, and is more tolerant of heat and drought. Its shape is more open and irregular than many other varieties. This makes it more appealing for natural plantings.
