

## *Celebration Maple*

*(Acer freemanii 'Celebration')*

Mature Height: 40'-50'

Mature Spread: 25'-35'

Growth Rate: Fast

Fall color: Yellow/orange/red

Celebration is also a cross between red and silver maples. It is seedless and has a more upright, pyramidal shape than the Autumn Fantasy. In fall, the leaves start out turning red and become a beautiful red-gold. The appearance is very similar to a sugar maple at this time of the year. This tree is very hardy and disease

resistant. It grows in most soils and is drought and wind tolerant. Its strong branching makes it less susceptible to damage in heavy snow or ice storms. The Celebration Maple has a very fibrous root structure and is less prone to surface roots that can damage sidewalks and other structures on your property.
