

## *Chanticleer Pear*

*Pyrus calleryana* 'Chanticleer'

Mature Height: 35'-40'

Mature Spread: 15'-20'

Growth Rate: Moderate

Fall color: yellow/orange/red

Flower: White

The Chanticleer (also known as Cleveland Select) Pear is the icon of the ornamental pear trees. It is the most upright and hardy of the ornamental pears. It is resistant to fireblight, and strong winds. The flowers are profuse and white, coming on early in the spring. The fruit is small and scant.

The summer leaves are bright green and turn shades of yellow, orange, red and burgundy in the fall. Because of its beauty, shape and hardiness, the Chanticleer Pear has been widely used as a street tree in urban areas. Its flowers and fruit will attract butterflies and birds to your landscape.
