

## *Sugar Tyme Crabapple*

*(Malus 'Sutyzam')*

Mature Height: 15'-20'

Mature Spread: 10'-15'

Growth Rate: Medium

Fall color: Yellow

Flower: White

Sugar Tyme is one of the best of the white-flowered crabapples. It is very resistant to all of the major crabapple diseases and is quite drought tolerant. The pink buds come on early in the spring, then open into abundant white blossoms. The fruit is small and bright red. It is a favorite food of many birds and small animals, and attracts the wildlife to your landscape. It is more disease resistant than the Spring Snow. It is hardy and easy to grow. It may need some minor pruning as a young tree to maintain ideal branching as a mature tree.
